

POWER STRADA *#308 WONDERFUL*

HIGH GRADE POWER CABLE with PC-Triple C CONDUCTOR

● We start the design our cables from the Research of Each Factor that effects on the Sound Quality. From our long Experience & long Listening sessions, we decided to use PC-Triple C as the Conductors of this "POWER STRADA #308 WONDERFUL". Important Factor of the Conductor, we put following Important Materials on this Power Cable.

- ① Replacing of the PC-OCC, Forging Technology was taken to make better material of the Conductor/Copper, which was invented by the engineers of the PC-OCC production. The Forging Technology made the Copper Crystals more tight & finally made long Crystals array towards the Electric current axis. [The name of the New Conductor = PC-Triple C=Pure Copper-Continuous Crystal Construction]
- ② Large sectional area which is enough for Large Power Amplifiers.
(over 5.5-square mm)
- ③ The formulated as Nanotec Systems' Power Cables, Gold & Silver Nano-Sized Micro Particles dispersed in Natural Oil were coated evenly.

Resulting of above points, Original Sounds details or Faint but important Airy Informations are retrieved, as much as Strong Crescendo & Natural De-Crescendo were reproduced, without harshness or un-natural.

The musician seems to be apart from the person who is interested strong in reproduction music & not to be interested in the reproduction music that is audio. We could meet several musicians who have strong interests in reproduced music. They have very keen golden ears which can detect the reproduced sound quality, better than Audio Enthusiast.

With our relation-ship with those musician, we repeated the interchange of opinions with them and recording engineers more and more to spent important session for polishing of our sound quality.

Power Cable flows most large electric energy currents in audio cables. It must supply very pure sine-wave into Audio/Visual Instruments. Our #308 can do such important work for Audio/Visual components better. Please try to connect this Power Cable with your most favorite system. You will hear the difference.
