● Released in 2009, the Former model : SP#79Mk-2 was very highly evaluated as the New Era of Golden Strada Speaker series. We apply the Same Philosophy on the former Mk-2, we could developed New Speaker Cable Model [SP#79Mk-2 HV] using [HiFC] Conductor, which was developed by Japanese Metal Manufacture "Hitach Metal Corp." .

SP#79Mk-2 HV followed Original SP#79Mk-2's Footsteps, as the Hybrid Construction of "Dual Diameter Conductors" as much as "Tripple Vibration Absorbing Materials" adding New Conductor [HiFC]. The result was "Low Distortion" "Detailed Signal Appearance" and "No loosing Musicality" .

Consequently, every possible Music, including "Classic Orchestra" "Modern Jazz" "Percussion Instruments" "Female or Male Vocal" or "Charch Organ & Chorus" etc. can be reproduced with High Satisfactions" .

As you can see in above specification, Plus & Minus conductors are consisted with 7-Strings of 0.5mmφ, rather Fat Core OFC is surrounded with 0.18mmφ of 26-Strings of [HiFC] conductors. These Conductors are soaked with Nanotec-Systems Original Nano-sized Gold & Silver micro particles dispersed in Natural Oil.

You will notice the Different Superiority from other regular Speaker Cables, by just One Listen, we believe.
